# Guidelines for Demonstrating Conformance with Tree Protection Standards

**Contact:** For additional information regarding these guidelines, please contact the City of Redmond's Department of Planning and Community Development at 425/556.2494 or your assigned project planner.

**Description:** This handout is intended to both summarize tree protection requirements and to provide a sample format for demonstrating compliance with code.

**Summary of Regulations:** The following table summarizes the regulations related to tree preservation in the City of Redmond. For more information, please refer to RCDG [20D.80 Landscaping and Tree Protection](#).

**Measuring Trees (DBH):** *Single-Trunk Trees.* Trees are measured according to their Diameter at Breast Height, or "DBH". "DBH" is the diameter, measured straight across the tree trunk at 4.5' above grade.

*Multi-Trunk Trees.* Where trees have more than one trunk or stem at 4.5' and those stems come from the same "base", the DBH for each stem at 4.5' is measured. The DBH is then the average of the DBHs of each the stems at 4.5' above the ground.

Example: In the picture to the left, where the horizontal dark line is at 4.5' high, the DBH would be the average of the diameters of A, B, & C. So,  $DBH = (DBH_A + DBH_B + DBH_C)/3$

Type of Tree (DBH)	Proposed Action and Brief Definition		
	Removal (The tree is cut down/removed from the site.)	Impacted (The tree is left standing, but ground disturbance is occurring within 5' of the tree's dripline.)	Retained (The tree is left standing and ground disturbance is NOT occurring within 5' of the tree's dripline)
Landmark (> 30")	<b>Prohibited</b> , unless approved by an exception. A written exception request is required. Mitigation required, i.e. replacement trees at a ratio of 3:1, if exception is approved.	<b>Prohibited</b> , unless approved by an exception. A written exception request is required. Preferred over Removal.	<b>Required for all Landmark Trees</b> , unless exception is granted.
Significant (6" - 30")	Regardless of the percentage of removed trees, mitigation, i.e. replacement trees at a ratio of 1:1, are required for each removed tree.	Encouraged over Removal.	<b>35% of all Significant Trees Required.</b>
<b>Notes:</b>	<b>No more than 65% of healthy Landmark + Significant Trees may be removed</b> , unless approved by an exception. <b>If approved, then</b> mitigation is required, i.e. replacement trees, at a ratio of 3:1 if exception is approved.  <i>Tree Replacement Performance Bond required for each replacement tree. 3 year maintenance bond required after performance.</i>	<i>3-year Tree Replacement Performance Bond required for each replacement tree. The bond is used if an impacted tree dies and the applicant does not replace it.</i>	<i>5-year Tree Preservation Bond is required for each Retained Tree. The bond is used if an impacted tree dies and the applicant does not replace it.</i>

**Arborist  
Report:**

*An Arborist Report shall document (1) the trees on site and (2) any off site trees that will be impacted by clearing or other improvements within 5 feet of its drip line. At a minimum, the arborist's report shall:*

1. Describe the site in narrative and provide an aerial or site plan documenting the locations of tree stands.
2. Describe the methodology, which must be considered the best of available science, that was used to rate each and every tree. Describe how trees were tagged in the field.
3. Document through a table the following for each tree of 6" or greater in dbh: Tree Number, Species, DBH, Health, Comment on Health, and Proposed Action. The Tree Number is that number that is affixed to the tree in the field and is used to identify it on a surveyed map.
4. Provide a surveyed map locating each tree, numbering each tree with its identification number, illustrating each tree's dripline, and illustrating 5' from each tree's dripline. Symbols shall be used and described in a legend to distinguish the following groups: Unhealthy Trees to be Removed, Significant Trees to be Removed, Landmark Trees to be Removed, Significant Trees to be Impacted, Landmark Trees to be Impacted, Significant Trees to be Retained, and Landmark Trees to be Retained.
5. Recommend actions for impacted trees and general management, as appropriate.
6. Provide a map illustrating the locations of replacement trees.
7. Provide an exception request for any proposed action that would not comply with the tree protection standards, such as: removing a healthy landmark tree or having a retained tree count below the required 35%.

**Summarizing  
Compliance  
with Code.**

*The following table provides you with the format that is required for summarizing a proposal's conformance with the City's tree protection regulations. The table must appear in the Arborist Report and on the Tree Preservation Plan, both of which are part of the application. **Please include the total number of trees that are 6" or greater and the number of unhealthy trees in the report.***
